Convenor from ISOT

K B Saha Foundation and

Primary Hyperoxaluria Society of India

Midnapur

West Bengal

India

Dear Dr. Nayak,

On behalf of the Indian Society of Organ Transplantation, please accept our heartiest congratulations on commencing your Patient Support Organisation to help the unfortunate who suffer from Primary Hyperoxaluria which may ultimately lead them into End Stage Renal Disease requiring transplantation of both liver and kidney simultaneously. The Indian Society of Organ Transplantation is acutely aware of the distress the suffering experienced by such patients due to lack of organs for transplantation.

Our Society applauds your efforts and is prepared to support you in your endeavor by giving every possible opportunity at our conferences and scientific meetings to present your achievements in the scientific and social endeavors of your society. For your information, The Zonal Transplantation Coordination Committee of Mumbai has already resolved that patients of hyperoxalosis requiring transplantation of liver and kidney will be given priority in the Cadaver Transplant distribution list. The ISOT will request other regional bodies involved in organ procurement and distribution, to also make similar arrangements for the unfortunate patients of hyperoxalosis.

Looking forward to a long and fruitful association and wishing you all success in your endeavor.

Yours sincerely,

Dr. Ashok Kirpalani

President

ISOT
